- **High CTR (11.76%) and Engagement Rate (13.56%)** → clearly indicate that the **ad creatives, messaging, and targeting at the top of the funnel are very effective**. People are interested enough to click, like, share, or comment.
- **Low Purchase Rate (0.61%) and only 1.3K conversions out of 216K impressions** → shows a **sharp drop-off in the lower funnel**. This is a classic case of "awareness and interest" being strong but "action (purchase)" being weak.
